

STYLE # 6000 : EXPANDED PTFE TAPE

Construction: Expanded soft packing made from a special grade PTFE resin with one side Adhesive strip

Construction: This expanded soft packing fills all the voids in uneven or damaged surfaces thereby giving perfect sealing. It is chemically inert & can be used with almost all chemicals. One side of the packing has an adhesive strip hence it is very easy to install. It is widely used in place of gaskets. Recommended for sealing flanges, housing of pumps, compressors, gearboxes, manholes, heat exchangers, reactors, agitators, mixers, tank lids & many other such applications.

Technical Parameters: Temperature: - 200°C to +260°C
pH Range: 0 - 14
Pressure: 200 Kg/Cm²
Shaft Speed: -
